

Inria Sophia Antipolis - Méditerranée center welcomes over 150 doctoral students in its research teams and is a major component of education activities in University Nice Sophia Antipolis (UNS) among others. It has contributed to the development of new masters' degree programs.

- An international Master 1 <http://computerscience.unice.fr/master1> and two international Master 2 at UNS.

The research center is associated with the leading master's and doctoral schools in the region.

In the project Alyssa, Inria will host internships of students following Masters in Tunisia or in one of the partner Universities (mainly at UNS or U. Montpellier2). In particular the students can follow these new masters' degree programs:

- An international Master 1 <http://computerscience.unice.fr/master1>
- Two international Master2 at UNS:
  - Ubinet (Ubiquitous Networking and Computing) <http://computerscience.unice.fr/ubinet>
  - CBB (Computational Biology and Biomedicine) <http://computerscience.unice.fr/cbb>
- One in ICT- Health in Montpellier 2 <http://www.telecom-montpellier.fr/>

Inria will also welcome PhD students (18 months) and post-docs (6months) from Tunisia to work in one of its team in collaboration with the Tunisian partners.
